

IMMUNIZATION FACT SHEET

For Your Information

Individuals frequently have questions related to the immunizations required and where they can obtain these immunizations. This sheet is provided to help answer those questions.

Immunizations that must be documented are:

- MMR Vaccinations or Titer (blood test to show immunity)
**Rubella* is the “R” of the MMR. This does not apply to you if you were born before 1957 and not of childbearing age.
**Rubeola* (measles) vaccine X2 (one dose with 2nd dose at least one month later). This is one of the “M’s” of the MMR. If you were born before 1957 you would only need one documented MMR
- Tuberculosis Skin Test (PPD) documented within the last year. (If you have never had a test done, you will need one and a follow-up test in 2-3 weeks.) If there is history of a reactive test or active disease, a chest x-ray is required.
- Td vaccine (Tetanus & diphtheria) must be within the last 10 years.
- Positive history of varicella (chicken pox) documented by a family member **or** a titer **or** the vaccine (two doses, 4-8 weeks apart).
- Hepatitis B vaccination series (a series of 3 – an initial dose, 2nd dose one month after the first, and 3rd dose six months after the first injection) **or** a signed waiver acknowledging your understanding of the risks of the disease. (These waivers are available at Meridian Technology Center at the Health Occupations Counter.)

Note: some facilities will not administer Tetanus vaccine and the TB test at the same setting.

Most health departments will administer the Td and MMR vaccination. Some health departments will do the TB test. Other options for obtaining the immunizations are with your personal physician, a walk-in clinic, or

AMC Urgent Care 1909 W. 6 th (Stillwater) 405.385.0029	Cost: Physical (aka pre-employment exam) \$75.00 TB test (no office visit charge) \$15.00 Hepatitis B vaccine <i>each</i> (no office visit)\$80.00
--	--
